OUR COMPANY

Unisorb Canada specializes in custom engineered solutions for a wide range of vapor phase air purification and contaminant control applications. We develop and apply proven technology to provide efficient and cost effective solutions.

Unisorb Canada provides complete Engineering/ Procurement/Construction services with a "Total Responsibility, Turn-Key" approach to meeting your specific air purification requirements.

Unisorb Canada also provides in-house laboratory, chemical production and unit fabrication facilities for our customers worldwide.

APPLICATIONS & CLIENTELE

Corrosion Control for the protection of sensitive instrumentation and electronic equipment in corrosive environments.

Odor Control for industrial and municipal wastewater treatment plants and collection systems.

Environmental Emission Control to meet strict V.O.C. regulations.

Personnel Protection from hazardous vapors in accordance with occupational exposure regulations.

- ➔ Sewage Pumping Stations
- ➔ Airport & Truck Loading Facilities
- ➔ Composting Plants
- ➔ Landfill & Leachate Treatment Plants
- ➔ Artifact Museums

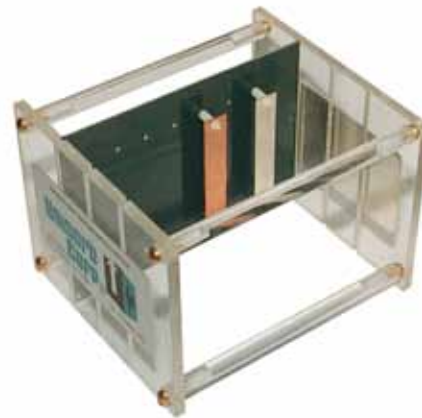

UNISORB CANADA FILTER MEDIA

Unisorb Canada produces a variety of filter media for efficient and cost effective removal of all corrosive and odorous gaseous contaminants.

ENVIRONMENTAL MONITORING & TECHNICAL SERVICES

Unisorb Canada has endorsed and adopted ISA S71.04-1985 guidelines and performance specifications. Our deep bed scrubbers are designed to remove all contaminants. Our laboratory media testing predicts media performance and corrosion coupon testing confirms G1 environments.
